Dürr imaging range

Dürr Dental has been shaping dental diagnostics for more than five decades. Digital X-ray technology using image plates and sensors produces images quickly and safely with the highest possible resolution.

LATEST DÜRR TECHNOLOGY:

VistaScan Ultra View is the newest Phosphor Plate Scanner from **Dürr Dental**. Scan multiple plates simultaneously. Standalone mode means you can view your exposures on the large built-in screen even if connection to the Database is lost. Attach them to your patient's file when the connection is restored means no more lost images and no downtime.

The VistaIntra DC – the intraoral X-ray generator, produces fast, high-quality image results. It leaves the factory pre-programmed with the exact radiation dose for every tooth region required for **Dürr Dental** image plates and sensors.

Infection control

Infection control keyboards are designed to provide smarter prevention and control of contaminants such as hospital-acquired infections (HAIs).

Screening systems from **Xenon Fever Defence** have been designed to enable quick, non-contact temperature analysis.

SERVICING

Dentsply Sirona X-ray

Abacus offer annual servicing across the **Orthophos** range. Servicing your **Dentsply Sirona** extraoral X-ray keeps it accurate and up-to-date. Your images need to be as accurate as possible to guarantee proper measurements. Each device is fully calibrated and a dose measurement is taken. A certificate of service is provided to cover CQC requirements.

Dentsply Sirona CEREC

Dentsply Sirona CEREC intra-oral scanners and mill units are the best chair-side restoration solutions available. Money saved on lab-fees are turned easily into great profit and patient satisfaction is achieved by offering a quick turnaround of many restorative treatments with long-lasting, accurate results.

X-ray safety tests

- **Critical Examination**
- **Acceptance Test**
- **Routine Testing** (often called a QA Test)

Abacus test your devices in accordance with the requirements of **Regulation 32 (2) of The Ionising Radiations Regulations 2017**. Certification will be provided on successful completion of test.

Call 0333 023 0400 for your Dentsply Sirona and Dürr Dental consumables

REMOTE SUPPORT

Remote Monitoring & Management

Our **RMM** system routinely monitors and checks your systems are running properly. Each device reports back to **Abacus** throughout each day. The system reports any issues found which we can act on or even advise you of potential problems before they arise. Weekly reports can be sent to your email.

UNIFI NETWORKS

UniFi from Ubiquiti

Enter the world of **UniFi** to fulfil all your essential needs for business or home networks. Full-featured, easy-to-use networking devices for your business network. **UniFi** is an ecosystem of wireless access points, routers, switches, security cameras, controller devices, VoIP phones and access control products.

TELEPHONY

Universe Hosted Solution

Connection is via the internet so there is no need to buy and maintain an on-site phone system. Access the system by your choice of device: fixed desk phones, mobile handsets or via the softphone application which is downloaded onto your computer.

DATA SECURITY

Ransomware Protection

More than ever your data is at risk - from unintentional deletion, to sophisticated ransomware attacks. **Abacus Ekco** helps prevent this by retaining regular backups - so if your system is attacked, you'll be able to restore to a point before the damage occurred.

SOFTWARE

Microsoft 365

Microsoft 365 is the productivity cloud designed to help each of us achieve what matters, in our work and life, with best-in-class Office apps, 1 TB of cloud storage, intelligent cloud services, and advanced security all included with your subscription.

LOGOS & IDENTITY

WEB DESIGN

PRINT & MARKETING

“Good design should look like it was easy to create.”

The big idea

When designing a logo or new brand, our focus is always on one simple idea, that looks appealing and communicates well.

To find a good solution, the key is to ask the right question... through relevant research.

Once people see the solution, they assume it was easy to find. In fact, the best method of design is to learn as much as possible about the subject to form an idea and make it truly relevant and intriguing.

Interactive screens

Web design is an ever-changing environment of new technology and languages. Now HTML5 standards have become best practice, websites can be less bloated and use the latest CSS techniques to add flare and polish.

Our **WordPress site package** includes a secure SSL certificate, which adds security to your site to protect user data in line with GDPR regulations. It also includes Yoast SEO to help promote your site's Google ranking.

Ink on paper

We have a wealth of experience, both in **Print Design** and in **Art Direction** with photographers.

We can provide any print design: corporate identity (letterheads, compliment slips and business cards, etc), packaging, leaflets, book covers, point-of-sale, illustration and signage.

Professional artworking and a good understanding of the print process is key to getting the best results from your design.
